

I strongly object to HR 4026. I love my XM and tell the NAB lobbyist to get out of my back pocket and let me vote with my \$\$, truly the American way. Traffic, weather, video (future) etc is the way of the future and I've never been back to FM after I installed my XM 2 years ago. Keep the technology changing and everyone benefits and old rules get broken (sorry NAB lobbyist but it's a new era of choice). Also thanks for pushing through Number Portability for cellular. I love my new carrier Verizon and that was all about choice and freedom. Thanks Doug-dedicated XM and Verizon lover.
